SCRUM Interview Simulation

Project Title: SmartShop

Context: A company called TechForward is interviewing a SCRUM team that will develop SmartShop, an e-commerce app that recommends products using Artificial Intelligence.

Team Members:

- Cristian – Product Owner
- Diego – Scrum Master
- Ramiro – Frontend Developer
- Sebastian – Backend Developer

Maria IA (Interviewer): Good morning, everyone. Thank you for coming today. We are looking for a SCRUM team for our new project SmartShop. Could you please introduce yourselves and explain your roles in the team?

Cristian (Product Owner): Good morning! My name is Cristian, I'm 38 years old, and I live in Córdoba. I studied programming and I have experience managing web and mobile projects. As the Product Owner, my main responsibility is to define the product backlog and make sure the team builds the right features for the client. I work closely with the Scrum Master and developers to plan each sprint and ensure that every deliverable adds value to the product.

Diego (Scrum Master): Hello! My name is Diego, I'm 30 years old. As a Scrum Master, I help the team stay organized and follow the SCRUM framework correctly. I facilitate all the SCRUM meetings like daily stand-ups, sprint reviews, and retrospectives. I can manage time, solve conflicts, and remove obstacles that block our progress. I use tools like Jira and Trello to track the sprint tasks.

Ramiro (Frontend Developer): Good morning! My name is Ramiro, I'm 19 years old, and I'm a frontend developer. I work mainly with React and JavaScript, creating dynamic and responsive user

interfaces. In this project, I will focus on building the client-side of SmartShop and improving the user experience. I really enjoy teamwork and learning from others during each sprint.

Sebastian (Backend Developer): Hi! My name is Sebastian, I'm 29 years old, and I'm a backend developer. I work with Node.js and Firebase, developing APIs and managing the database. In SmartShop, I'm responsible for connecting the frontend with the recommendation engine. I can also write unit tests and help with code reviews to keep the code clean and efficient.

Maria IA: Sounds like a strong team! Could you describe what a typical day looks like in your SCRUM routine?

Diego: Every morning, we start with our daily stand-up meeting to talk about what we did yesterday, what we'll do today, and any problems we have.

Cristian: After that, I review the product backlog and check priorities to make sure we are on track with the sprint goal.

Ramiro: Then we focus on coding, testing, and pushing our updates to GitHub.

Sebastian: At the end of the sprint, we do a sprint review and a retrospective to improve our teamwork for the next cycle.

Maria IA: Perfect! What tools do you use to collaborate?

Cristian: We use Slack for communication, Jira for project management, and Figma for UI design.

Diego: And we also use GitHub for version control and Canva for our presentations.

Maria IA: Great! Thank you all for your time. You seem like an excellent team for this project.

Cristian: Thank you! We're really excited to start this project.

Diego: Thank you for the opportunity. We'll make sure to keep the process efficient and organized.

Ramiro: Thanks! I'm looking forward to building a great user experience.

Sebastian: Thank you very much! I'm eager to work on the system and make it reliable.
